Komamura Launches Horseman VCC PRO (DB) View Camera Converter

Komamura Corporation, Tokyo, Japan, announced the availability of the Horseman VCC PRO (DB), a new view camera converter system designed exclusively for professional digital backs.

It offers full technical movements such as tilt/swing, rise/fall and lateral shift functions allowing to use a variety of large format camera lenses. Since it is designed to be lightweight and compact, it will work as an essential tool not only for indoor studio photography, but also outdoor location photography.

The VCC PRO (DB) offers a full control on increasing or reducing depth of field with utilizing tilt or swing as well as on correcting or exaggerating the perspective distortion by applying rise/fall movements. Multi image stitching is possible by ultra precise spindle drive for panoramic effects and for increasing the photographing area.

Adapter plates are interchangeable and those for Hasselblad V, Hasselblad H and Mamiya 645 digital backs are prepared. Interchangeable adapter lens panels are provided to accept Horseman 8x8cm lens panel and Linhof standard lens panel while the other lens panels drilled for #0 and for Horseman ISS digital shutter are also provided.

The Horseman VCC PRO (DB) is an advanced photographic system that offers precise technical movements through the experienced technologies Komamura has accumulated for years through the developments of its technical and large format view cameras. The system is designed lightweight and compact for an easy hand carry, yet it fulfills all professional specifications and displays its great power in all application fields ranging from commercial, portrait, architecture, interior to landscape photography.

The Horseman VCC PRO (DB) is an advanced photographic system that;

- is lightweight and compact,
- accepts various digital camera backs,
- offers tilt/swing and lateral shift on the front standard as well as rise/fall on the rear standard,
- supports the ISS digital shutter system, and
- allows the use of large format camera lenses.

HORSEMAN VCC PRO DB
